

SUBJECT INDEX

A

- Abscess, due to zirconium, 452
- Accelerators, patch tests with, 105
- Acne, cystic and papular, steroids in, 315
- Acrosclerosis, treated by chelation, 273
 - tryptophan metabolism and, 289
- ACTH, leishmanin reaction and, 15
- Adhesive tape, hypoallergenic, experimental study, 81
- Alkylaryl sulfonate, effect of on keratinization, 380
- Amethopterin, effect of on hair roots, 197
- Amino nitrogen content, in psoriatic scales, 247
- Anticholinesterase agent, penetration of into skin, 299
- Antihistamines, as anesthetics, 7
- Anti-malarials, and lupus erythematosus, 97
- Apocrine gland, implant of, 355
- AT-10, dihydrotachysterol, 9
- Atopic dermatitis, pathogenetic mechanism, of, 76
 - psychologic factors in, 67
 - vascular skin response in, 67
- AU cells, and HeLa cells, 386

B

- Barrier, epithelial, 367
- Barrier creams, primary irritant activity and, 223
- Benadryl, as anesthetic, 7
- Benzophenones, 435

C

- Cadmium sulfide, in seborrhea capitis, 159
- Calcinosis, dihydrotachysterol and, 9
- Candida albicans, classification of, 111
 - special media for identifying, 263
- Carcinogenic hydrocarbons, and epidermal proteins, 39
- Carcinoma, basal cell, implant of, 356
- Cat, sensory end-organ of, 347
- Chelation, in scleroderma, 273
 - tryptophan metabolism and, 289
- Chloroquine, use of in lupus erythematosus, 99
- Chlorpromazine, photoallergy to, 319
- Chlortrimeton, as anesthetic, 7
- Cholesterol and esters, in surface fats, 339
- Cholinesterases, in hair follicles, 151

Corticosteroids (see Steroids)

Covicone, patch tests with, 224

Crystalline pigments, of trichophyton rubrum, 47

D

- Deodorants, with zirconium, 449
- Dermatologist, as an individual, 241
- Dermatophytes, invasion of hair by, 161
- Dermoid cyst fat, 445
- Desoxyribonucleic acid, metabolism of in rat skin, 415

E

- Eccrine sweat gland, implant of, 354
 - periodic acid-Schiff material in, 213
- Electron microscope study, of human skin, 131
- Endrate, in scleroderma, 278
 - tryptophan metabolism and, 289
- Epidermal regeneration, by strip method, 407
- Epidermis, freckled, melanocytes in, 253
 - melanocytes in (strip method), 217
 - tonofibrils of, 327
- Epithelial barrier, 367
- Epithelial-like cells, tissue culture of, 383
- Epoxy resin, sensitizing structure in, 311
- Equine ringworm, 34
- Esterase, in sebaceous gland duct, 428

F

- Fat, dermoid cyst, 445
- Fats, surface, cholesterol and esters in, 339
- Fetal skin, implant of, 357
- Fluorescence of rat hair, 1-kynurenine and, 471
- Freckles, melanocytes in, 253
- Free fatty acids, biogenesis of in surface fat, 423

G

- Granuloma, zirconium, 452

H

- Hair, dermatophytes in, 161
- Hair follicle, cholinesterases, 151
 - implant of, 355
- Hair roots, amethopterin therapy and, 197
 - radiation effects on, 205

- AeLa cells, and AU cells 386
 Herpes simplex virus, and tissue culture cells, 387
 Heterologous hosts, skin appendages and tumors in, 353
 Hyaluronidase, and Leishmanin reaction, 15
 Hydrocarbons, carcinogenic, 39
 Hydrocortisone (see also Steroids)
 effect of on pruritus, 91
 Hydrocortisone acetate (see Steroids)
 Hyperlipemic serum, lipemia-clearing and, 465
- I
- Implant, of fetal skin, 357
 Itching, effect of hydrocortisone on, 91
- K
- Keratinization, effect of irritating substances on, 377
 Keratinizing epithelia, phosphamidase in, 393
 Kerodex, patch tests with, 224
- L
- Leishmanin reaction, inhibition of by steroid, 15
 Linoleic acid, effect of on keratinization, 377
 Lipemia-clearing, inhibition of, 465
 Lipid skin studies, with monomolecular layer method, 55
 Lipolytic activity of skin surface, 426
 L-Kynurenine, and fluorescence of rat hair, 471
 Lupus erythematosus, anti-malarials and, 97
- M
- Magnor, patch tests with, 224
 Malonic acid salts, inhibition of perspiration by, 251
 Malpighian cells, and melanocytes, 217
 Melanocytes, and malpighian cells, 217
 in epidermis (strip method), 217
 in freckled epidermis, 253
 in human skin, 181
 in thorium X-treated skin, 185
 Melanoma, subungual, 119
 Melanotic Whitlow, 119
 Mercaptobenzothiazole, sensitivity to, 106
 Monobenzyl ether of hydroquinone, sensitivity to, 106
- Monomolecular layer method, lipid studies with, 55
- N
- Neo-antergan, as anesthetic, 7
 Nucleic acids, metabolism of in rat skin, 415
- O
- Oleic acid, effect of on keratinization, 377
- P
- Paper chromatography, of steroids, 1
 Perspiration, inhibition of by malonic acid salts, 251
 Phenergan, photoallergy and cross-sensitivity to, 319
 Phosphamidase, in keratinizing epithelia, 393
 Photo-allergy to Phenergan and Chlorpromazine, 319
 Photocross-sensitivity to Phenergan and Chlorpromazine, 319
 Pigments, crystalline, of trichophyton rubrum, 47
 Presidential address: The Dermatologist as an Individual—An Appraisal of Cultural Trends, 241
 Proteins, epidermal, and carcinogenic hydrocarbons, 39
 Pruritus, effect of hydrocortisone on, 91
 Pseudo-epitheliomatous hyperplasia, 165
 Psoriatic scales, free amino nitrogen content of, 247
 Psychologic factors, in atopic dermatitis, 67
 Pyribenzamine, as anesthetic, 7
- Q
- Quinacrine, use of in lupus erythematosus, 99
- R
- Radiation effects on hair roots, 205
 Resin, epoxy, sensitizing structure of, 311
 Ribonucleic acid, metabolism of in rat skin, 415
 Rubber antioxidants, patch tests with, 105
- S
- Sarin, penetration of into skin, 299
 Scleroderma, treated by chelation, 273
 tryptophan metabolism and, 289
 Sclerosis, dihydrotachysterol and, 9

- Sebacous gland duct, esterase in, 428
Seborrhea capitis, cadmium sulfide in, 159
Seborrheic keratoses, 165
Sebum, squalene, 269
Selenium, effect of on keratinization, 380
Sensitization, to adhesive tape, 81
Sensory end-organ of hairless cat skin, 347
Silicote, patch tests with, 224
Skin, human, appendages and tumors in
 heterologous hosts, 353
 cytochemistry of, 151
 electron microscopy of, 131
 histology of, 151
 melanocytes in, 181
 penetration of anticholesterase agent in
 in, 299
 thorium X-treated, melanocytes in, 185
Society for Investigative Dermatology,
 Report of Annual Meeting, 229
Spectrophotometric methods, in cholesterol
 determination, 341
Spreading index of lipids, 59
Squalene in sebum, in skin cancer patients,
 269
Steroids, effect of on acne, 315
 local action of, 1
 Leishmanin reaction and, 15
 paper chromatography of, 1
Stratum corneum, electron microscopy of,
 138
Stratum germinativum, electron micros-
 copy of, 133
Stratum granulosum, electron microscopy
 of, 137
Stratum lucidum, electron microscopy of,
 138
Strip method, epidermal regeneration with,
 407
Sunscreening agents, 435

 T
Tetramethylthiuram monosulfide, sensi-
 tivity to, 106
Thorium X-treated skin, melanocytes in,
 185
Tissue culture of human epithelial-like cells,
 383
Tonofibrils of human epidermis, 327
Trichophyton equinum, taxonomy of, 27
Trichophyton rubrum, crystalline pigments
 of, 47
Tryptophan metabolism, in chelation-
 treated scleroderma, 289

 U
Ultraviolet light absorbing agents, 435

 V
Vaccinia virus, and tissue culture cells, 387
Vascular skin response, in atopic dermatitis,
 67

 W
Wheal, effect of hydrocortisone on, 91

 X
X-ray (see Radiation)

 Z
Zirconium, pathologic changes due to, 449
